Professional Summary

Result-oriented **Full-Stack Developer** with 2+ years of experience in building **scalable, high-performance** . Proficient in **AI Driven development** workflows to accelerate delivery and optimize code quality. Expert in **Responsive UI Development**, **Architectural Planning**, and **Requirement Analysis**. Proven track record of delivering maintainable solutions using modern frontend frameworks and **RESTful API** integration.

Skill

- **Programming**: HTML, CSS, JavaScript, TypeScript,PHP.
- **Frameworks/Libraries**: React, Redux, Next.js,Nodejs,Laravel, Bootstrap, Tailwind CSS,Express js.
- **Development Skills**: Responsive Design, Problem-solving, Cross-Browser Compatibility, Firebase Authentication
- **Soft Skills**: Communication, Teamwork/Collaboration, Adaptability/Flexibility, Time Management

---

Projects

Project: EduManage (School Management System) - Live | Github
Tech Stack: React, Next.js, Tailwind CSS, Redux Toolkit

- Engineered a secure authorization system with distinct dashboard views and permission levels **for Admins, Teachers,Parent** and **Students**.
- Optimized data flow and server-side caching using **Redux Toolkit** and **RTK Query** for seamless state management.
- Built interactive data tables with advanced **filtering** and **real-time visualization charts**.
- Implemented secure **token-based authentication** and **protected routing**.
- Leveraged **Next.js** for server-side optimization and faster page loads

Project: E-Commerce-App – Live | Github
Tech Stack: React, Vite, Redux Toolkit, Sass, GitHub, Vercel.

- Built a high-performance product catalog with advanced **filtering** and **real-time** search.
- Built a persistent **shopping cart system** featuring real-time price and total **calculations**.
- Developed a mobile-first, responsive interface with **Sass** for cross-device compatibility.
- Implemented a structured checkout process with form validation and secure order handling logic.

Project: QuickHire – Live | Frontend : Github | Backend : Github | Record
Tech Stack: React, Redux, Laravel, and Tailwind CSS.

- Developed a **full-stack job board application** with **job listing, search, filtering, job details, and application submission** functionality..
- Built a secure **admin dashboard** to manage **job postings, categories, and applicant data**
- Implemented **resume upload, form validation, and REST API integration** to support a complete **job application workflow**.
- Designed and developed a **responsive, user-friendly interface** optimized for **mobile, tablet, and desktop** devices.

Work Experience

Company: Omega Solution

Software Development (**Full-Stack**)

- Developed responsive and user-friendly interfaces with **React.js**, **Redux**,**Tailwind and Bootstrap for 10+ projects**.
- Developed **Ticketing System (Frontend)** features and API integration.
- Developed **Salon Software (Frontend)** screens and workflows.
- Implemented **ERP (Backend)** modules with **Laravel (CRUD + DB)**.
- Built/consumed REST APIs using **Node.js/Express** and **Laravel.**

Education

Feni Computer Institute | 2017 – 2021
Engineering in Computer Science & Technology

Bangladesh University of Business and Technology (BUBT) | 2023-2026(Ongoing)
Computer Science and Engineering
